

FACT SHEET 2

Dictionary

About this chapter

The draft Shoalhaven Development Control Plan 2014 (draft DCP) Dictionary has been compiled from the definitions in all the existing development control plans that were integrated into the citywide draft DCP.

In most cases, the definitions in the Dictionary apply to the entire draft DCP; however there are a small number of terms that apply to a specific chapter within the draft DCP. In these instances, this is explicitly noted within the definition.

The Dictionary should be read in conjunction with the Shoalhaven Local Environmental Plan (SLEP) 2014, as there are some terms that have been excluded from the draft DCP Dictionary because they are defined in the SLEP 2014 Dictionary. However, there may be some terms mentioned within the document that cannot be found in either the draft DCP Dictionary or SLEP 2014 Dictionary. In these cases, you should refer to the ordinary Australian dictionary meaning, or other relevant legislation.
