

FACT SHEET G7

Waste Minimisation and Management Controls

About this chapter

Chapter G7: Waste Minimisation and Management Controls is a generic chapter that relates to the management of waste for all development in Shoalhaven.

This chapter is based on the existing provisions of:

- DCP 93 – Controls for Waste Minimisation and Management.

The majority of the provisions in DCP 93 have been carried across into this Chapter. Generic waste minimisation and management provisions are not contained in the generic or area specific chapters of the draft Shoalhaven Development Control Plan 2014 (draft DCP) and are instead located in this chapter for consistency and ease of use.
